RMKS/1. Purpose. This ALNAVRESFOR directs members, identified in paragraph 5, assigned to Navy Reserve Centers (NRCs) at all Navy Reserve Region Readiness and Mobilization Commands (REDCOMs) to participate in the Navy Reserve Mobilization-to-Billet Exercise (M2BX) starting 25APR2022 and ending 30MAY2022 in accordance with the mobilization exercise planning guidance and timeline of reference (a).

2. Background. In 2021, Commander, Navy Reserve Force planned, executed, and completed three mobilization exercises (MOBEXs) to develop, test, and evaluate distributed activation (DA) and distributed deactivation (DDA) processes. In September 2021, a new construct for mobilization named Adaptive Mobilization (AM) was conceptually approved by the Chief of Naval Personnel (CNP) and the Chief of Navy Reserve (CNR). AM was designed to satisfy both steady-state and mass activation requirements and encompasses all processes of DA, distributed mobilization (DM), distributed de-mobilization (DDM), and DDA. The AM construct was announced via reference (b). The forces must continue to execute and leverage readiness improvement initiatives directed in references (c) and (d). FY22 MOBEXs are designed to evaluate the progress to drive
readiness across the force as well as develop and improve AM processes. M2BX is the second exercise in the series for FY22.

3. Commander's Intent. Commander, Navy Reserve Forces Command (CNRFC) executes AM to mobilize designated personnel for both (1) mass activation in support of long-term strategic competition as well as (2) steady-state and emergent ad hoc augmentation. Exercises evaluate and improve mobilization processes and readiness for strategic competition. To that end, Mass Activation Exercises (MAX), Mobilization-to-Billet Exercise (M2BX), integration into a Fleet Exercise (FLTX) and planning for Navy Reserve participation in Large Scale Exercise (LSE) 2023 were directed in reference (a).

4. Execute. CNRFC will execute M2BX with all members identified in paragraph 5, and their associated REDCOMs and NRCs (TRUIC).

A. Unit members identified in this message will complete mobilization requirements in coordination with their NRC. In-person activation at the NRC is at the direction of the REDCOM and NRC. REDCOMs and NRCs may elect to perform virtual activation if appropriate.

B. Simulations and clarifications
   (1) NRCs are directed to execute all normal mobilization processes and procedures while conducting M2BX. No items should be simulated unless otherwise directed herein.
   (2) Individual mobilization status (IMS) codes (R##, RC1, RC2, etc) will not be entered in NSIPS. IMS code changes associated with M2BX will be simulated.
   (3) Orders for M2BX will not be available in the Navy and Marine Corps Mobilization Processing System (NMCMPS). Members will simulate obtaining orders from NMCMPS by downloading an orders/instruction template in the required documents section of the CNRFC N15 Distributed Activation SharePoint Portal. https://private.navysponsor.navy.mil/cnrfc/N-Codes/N1/covid/Pages/default.aspx (CAC required).
   (4) If a member meets the requirements for mobilization cancellation per Reference (e), the NRC will submit a cancellation request with all required information to CNRFC N35 via their REDCOM using the CNRFC N35 Mobilization Cancellation Request Portal. https://private.navysponsor.navy.mil/cnrfc/N-Codes/N3/mobilizationportal/mobcanx/Pages/Home.aspx (CAC required). The cancellation request will include language to identify that this cancellation is for the M2BX (i.e. M2BX - EXERCISE EXERCISE EXERCISE - M2BX).
   (5) The following NAVPERS 1300/22 checklist clarifications are provided:
      a. Section 2, Part 1.l: Simulate selecting "IA Option" in PRIMS.
      b. Section 2, Part 1.o: PRD extensions will not be granted for M2BX. NRC communications with NAVRESFORCOM (N12) will include language to identify that the request is part of an exercise. (i.e. M2BX - EXERCISE EXERCISE EXERCISE - M2BX).
      c. Section 2, Part 1.q: Per COMNAVRESFORNOTE 3060, deployment readiness training (DRT) is required of all SELRES every 3 years. Participants not in compliance will coordinate with their NRA to attend the next available training to ensure that the highest levels
of mobilization readiness are maintained.

d. Section 2, Part 1.r: Simulate CCC or transition officer (TO) uploading DD eForm 2648 to DMDC. All other portions of this step will be completed.

C. NRCs and participating unit members will find the required documents (including exercise orders) on the CNRFC N15 Distributed Activation SharePoint Portal (link provided in paragraph 4.B.(3) above). After selecting the appropriate "mob workflow," members will find required documents under the appropriate tab. Pay packet documents are expected to be 100% complete and accurate prior to submission. NAVPERS 1300/22 Expeditionary Screening Checklist (Section 1 & 2) and the NAVMED 1300/4 Expeditionary Medical and Dental Screening as well as any associated key supporting documentation shall be completed. Do not simulate completion of any checklist items unless delineated in paragraph 4.B. above.

D. Reporting

(1) NRCs are directed to provide the following items in daily summary reports to their ISIC by 0900 Monday - Friday:
   a. Number of M2BX members simulated RC1: NRC verbal contact with identified member
   b. Number of M2BX members simulated RC2: Member medical screening complete
   c. Number of M2BX members simulated RC3: Member departed NRC
   d. Number of M2BX members processing at Home
   e. Number of M2BX members processing at NRA
   f. Number of M2BX members processing at REDCOM
   g. Number of M2BS members processing at ECRC

(2) REDCOMs will consolidate reports from their NRCs and submit a consolidated report to the CNRF Crisis Action Team (CAT) Chief, CDR Joshua Strubeck, joshua.r.strubeck2.mil(at)us.navy.mil by 1300 Monday - Friday.

E. NRCs will report NAVPERS 1300/22 and NAVMED 1300/4 checklist items that were not able to be completed to their REDCOM via after action report (AAR). NRCs will aggregate data and report shortfalls (i.e. 12 members do not have a GTCC, 15 members require an official passport for their mob-to-billet ultimate duty station but do not possess one, 10 members require an audiogram, etc.) in their AAR. The AAR is intended to consolidate issues or shortfalls NRCs are experiencing executing AM processes and include possible solutions to alleviate the issue.

F. REDCOMs will use data consolidated from their NRCs AARs and submit ECH IV AARs to CNRFC by close of business 15 Jun 2022. A scorecard template and AAR template is posted on CNRFC N15 Distributed Activation SharePoint Portal (link provided in paragraph 4.B.(3) above) as a tool for NRCs to use to aggregate uncompleted checklist item data in support of AAR generation. NRC AARs should incorporate constructive feedback about exercise execution from participating SELRES.

5. Admin/Logistics. The following members organized by wave (simulated NRC report date listed after wave number) are directed to participate in M2BX:
