RMKS/1. Purpose. This exercise order (EXORD) directs Navy Reserve
Region Readiness and Mobilization Commands (REDCOMs), Navy
Reserve

Centers (NRAs), and units identified in para 5 to participate in the
Navy Reserve mass activation exercise 2022

-

2

(MAX 22

-

2). This EXORD

directs Commander Naval Air Force Reserve (CNAFR) and Naval
Special

Warfare Group ELEVEN (NSWG

-

11) to participate in MAX 22

-

2 in

accordance with the mobilization exercise planning guidance and
timeline of reference (a). CNAFR and NSW

G

-

11 participating units/

members will be promulgated sepcor via CNAFR and NSWG

-

11

respectively. This EXORD directs Bureau of Medicine and Surgery (BUMED) to solicit 77 suitable selected reservists (SELRES) to

provide medical support for selected NRAs (identified with an asterisk in para 5) during MAX 22

-

2 over the NRAs' normally scheduled September drill weekend. The detailed support request has been sent via sepcor to the BUMED Executive Committee (EXCOM) Pillar

lead via email on 02JUN2022. This support request is in line with

reference (b) designation of COMNAVRESFOR as the supported commander for Ready Reserve activation and deactivation processing. Travel required for BUMED SELRES providing medical support will be funded by CNRF using individual duty training and travel (IDTT)

orders utilizing additional training periods (ATPs). MAX 22

-

2

commences 01SEP2022 and ends 30SEP2022.

2. Background. In 2021, Commander, Navy Reserve Force planned, executed, and completed three mobilization exercises (MOBEXs) to develop, test, and evaluate distributed activation (DA) and distributed deactivation (DDA) processes. In September 2021, a new construct for mobilization named Adaptive Mobilization (AM) was conceptually approved by the Chief of Naval Personnel (CNP) and the

Chief of Navy Reserve (CNR). AM was designed to satisfy both steady

-

state and mass activation requirements and encompasses all processes of DA, distributed mobilization (DM), distributed

de

-

mobilization (DDM), and DDA. The AM construct was codified via reference (b). The Force must continue to execute and leverage readiness improvement initiatives directed in references (c) and (d). FY22 MOBEXs are designed to evaluate the progress to drive readiness across the Force as well as develop and improve AM processes. MAX 22

-

2 is the fourth and final exercise in the series for FY22.

3. Commander's Intent. Commander, Navy Reserve Force (CNRF) executes AM to mobilize designated personnel for both (1) mass activation in support of long

-

term strategic competition as well as (2) steady

-

state and emergent ad hoc augmentation. Exercises evaluate and improve mobilization processes and readiness for strategic competition. To that end, Mass Activation Exercises (MAXs), Mobilization

-

to

-

Billet Exercise (M2BX), integration in to a

Fleet Exercise (FLTEX) and planning for Navy Reserve participation in Large Scale Exercise (LSE) 2023 were directed in reference (a).

A. Per reference (e), each SELRES Sailor is required to know and understand the requirements of their programmed mobilization billet,

as well as to be ready to activate and serve in that billet on day one. MAX 22

-

2 is intended to exercise the mobilization

-

to

-

billet

pathway processes to ensure maximum warfighting readiness.

B. The main

objective of MOBEXs is to evaluate Echelon (ECH) IV/V

commands ability to execute adaptive mobilization processes with a

focus on accuracy of strength gain (i.e. activation) package

processing and screening checklist (NAVPERS 1300/22 and NAVMED 1300/4) com

pletion. The NRAs should demonstrate knowledge of

mobilization requirements and a mastery of administering screening

requirements via the expeditionary screening checklists (NAVPERS

1300/22 and NAVMED 1300/4 and associated documentation) to

identify

and re

port a lack of organic capabilities at each NRA i.e.

capability shortfalls as described in para 4.E. ECH IV/V commands

will be assessed on their ability to properly screen reserve members

for mobilization via the mob

-

to

-

billet pathway and report those

capa

bility shortfalls via after action report.

C. Participation is directed and mandatory for all members of the

units identified to participate in MAX 22

-

2, either by this EXORD or

sepcor. All members identified for participation who fail to

participate are

directed to be listed in the respective ECH III/IV/V

AARs directed in para 4.

4. Execute. CNRF will execute MAX 22

-

2 with CNRFC, REDCOMs/NRAs/
units identified in paragraph 5, CNAFR, and NSWG

-

11.

A. Participants will complete mobilization requirements i
n

coordination with their Navy Reserve Activity(NRA)/NRA.

(1) Unit identification for MAX 22

-

2 participation by REDCOMs/

NRAs was finalized on 30JUN2022 and is disseminated in para 5.
CNAFR/NSWG

-

11/REDCOMs are directed to provide CNRFC N35 with their

r

espective rosters of individual participating members by name and
electronic data interchange personal identifier (EDIPI)/DoD
identification number NLT 01AUG2022. CNAFR/NSWG

-

11/REDCOMs will

receive this task via enterprise task management software solution
(ETMS2) for tracking purposes. The by name list will include all
sailors who drill locally (TRUIC) and any members in assignment
processing (IAP).

(2) Consistent with MAX 22

-

1, the use of additional drills are

authorized for members to complete exerci
se requirements outside of

their normally scheduled drill weekend. If a unit's additional drill
balance is depleted and additional drills are required to complete
exercise requirements, a request will be submitted from Navy Reserve
unit leadership to their

NRA (ECH V command). CNAFR/NSWG

-

11/REDCOMs

will consolidate requests and submit to CNRF in accordance with

procedures/template promulgated to the adaptive mobilization readiness teams (AMRTs) sepcor. Once approved by CNRF, additional training periods (ATPs) will be deposited directly into the TRUIC of the members to be scheduled and executed during the exercise period. Additional ATP requests should be made via the process described herein, not made via reserve program directors (RPDs). CNAFR/NSWG

-
11/REDCO
Ms will submit consolidated ATP requests by 06SEP2022 at 2100Z. CNAFR/NSWG

-
11/REDCOMs will receive this task via enterprise task management software solution (ETMS2) for tracking purposes.

B. There will be three (3) CNRF N35 MAX 22

-
2 exercise coordination and execution meetings held for ECH IV/V commands and reserve unit leadership. All personnel attending these meetings should read this EXORD in its entirety prior to attending the meeting. These meetings will be held via Microsoft Teams on 26JUL2022 at 1900Z, 27JUL2022 at 2100Z, 28JUL2022 at 1900Z. Teams link:

[https://dod.teams.microsoft.us/j/19%3adod%3ameeting_d0de1c9510a04c159720e0ec1a5498ba%40thread.v2/0?context=](https://dod.teams.microsoft.us/j/19%3adod%3ameeting_d0de1c9510a04c159720e0ec1a5498ba%40thread.v2/0?context=%7b%22Tid%22%3a%22e3333e00)

C. Simulations and clarifications

(1) NRAs are directed to execute all normal mobilization processes, screenings, and procedures while conducting MAX 22

-

2.

No items should be simulated unless otherwise directed herein.

(2) Individual mobilization status (IMS) codes (R##, RC1, RC2, etc) will not be entered in NSIPS. IMS code changes associated with MAX 22

-

2 will be simulated.

(

3) Orders for MAX 22

-

2 will not be available in the Navy and Marine Corps Mobilization Processing System (NMCMPMS). Members will

simulate obtaining orders from NMCMPMS by downloading the orders/instruction template (MOBEX EXERCISE ORDERS_MOBEX USE ONLY.pdf)

in

the MOB Required Documents tab of the CNRFC N15 Distributed Activation SharePoint Portal.

<https://private.navyreserve.navy.mil/cnrfc/N>

-

Codes/N1/covid/Pages/
default.aspx

(CAC required).

(4) If a member meets the requirements for mobilization cancellation per reference (f), the NRA will simulate submitting a cancellation request and will continue executing exercise requirements to ensure member readiness for future possible

activations. Exercise cancellation requests for MAX 22

-

2 should NOT

be submitted via the CNRFC N35 Mobilization Cancellation Request Portal.

(5) The following NAVPERS 1300/22 (Rev. 06

-

2022) checklist

clarifications are provided:

a. Section

1.i: Simulate IMS code update to RC2 [Completed Medical Screening] upon completion of NAVMED 1300/4.

b. Section 1, Command IA Coordinator (CIAC) Verification: Simulate assigning service member to a CIAC in Navy Family Accountability and Assessment System (NFAAS) at <https://navyfamily.navy.mil>

.

c. Section 2, Part 1.i: Simulate selecting "IA Option" in PRIMIS.

d. Section 2, Part 1.o: PRD extensions will not be granted for

MAX 22

-

2. NRA communications with NAVRESFORCOM (N12) regarding PRD extensions will include language to identify that the request is part of an exercise.

(i.e. MAX 22

-

2

-

EXERCISE EXERCISE EXERCISE

-

MAX 22

-

2).

e. Section 2, Part 1.q: Per reference (c), deployment

readiness training (DRT) is required of all SELRES every 3 years. Participants not in compliance will coordinate with their NRA to attend the next available training to ensure that the highest levels of mobilization readiness are maintained.

f. Section 2, Part 1.r: Simulate CCC or transition officer (TO) uploading DD eForm 2648 to DMDC. All other portions of this

step will be completed.

g. Section 2, Part 3.(9): Simulate completion of Tactical Combat Casualty Care

-

All Service
Members (TCCC

-

ASM) Tier 1
certification (B

-

300

-

2010).

h. Section 2, Part 5.b: Simulate completion of detaching individual evaluation/fitness report.

i. Section 2, Part 5.c: Simulate IMS code change to RC3 to reflect Service member's active status (must be completed on RLD).

(6) The following NAVMED 1300/4 (Rev. 12

-

2021) checklist

clarifications are provided:

a. Part I, Section A, Item 11: SELRES will verify access to the Electronic Health Assessment (EHA) NMCPHC Website <https://data.nmcphc.med.navy.mil/eha/>

and ability to log in. NRAs

will report SELRES ability to access the website and indicate if the NRA has organic medical capability to review and certify submission

s. This information will be aggregated and reported by the NRA in their after action report. DO NOT complete a pre

-

deployment

health assessment (PreDHA), DD Form 2795 in the EHA website.

b. Part I, Section G, Item 6: SELRES will verify with the NRA

t

hat their medical record is maintained appropriately. Member will simulate record in hand.

c. Part III, Section A, Item 1: SELRES will verify with the NRA that their dental record is maintained appropriately. Member will simulate record in hand.

D.

NRAs and participating unit members will find the required documents, including exercise orders described in para 4.C.(3), on the CNRFC N15 Distributed Activation SharePoint Portal (link provided in paragraph 4.C.(3) above). After selecting the appropriate

mob workflow, members will find required documents under the MOB Required Documents (NAVPERS_1300_22_Rev06

-

22, TSC NORFOLK

ACTIVATION PAY GAIN PACKET_FILLABLE, April 2022, and MOBEX EXERCISE

ORDERS_MOBEX USE ONLY) and Medical Form Document PII (NAVMED 13

00

-

4)

tabs. ECH V staff will verify pay packet documents to be 100 percent complete and accurate prior to submission. Common strength gain packet errors identified during previous MOBEXs are: blanks in required spaces such as social security numbers, signatures, and

incorrect or missing order endorsements. NAVPERS 1300/22 Expeditionary Screening Checklist (Section 1 & 2) and the NAVMED 1300/4 Expeditionary Medical and Dental Screening as well as any associated key supporting documentation shall be completed

. Members

are directed via their exercise orders to electronically upload completed strength gain packets and NAVPERS 1300/22 exercise documents to the indicated fields in accordance with member activation submission guide. Members will not be able to upload

exercise documents to the CNRFC N15 Distributed Activation SharePoint portal prior to the exercise start date. If members attempt to upload exercise documents prior to the exercise start date they will receive an error. The ECH IV will ensure that a

||

participating member's NAVMED 1300/4 is uploaded to the "Medical Form Document PII" tab in the appropriate folder. DO NOT simulate completion of any checklist items unless delineated in paragraph 4.C above.

E. ECH V commands will report NAVPERS 1300/2 2 and NAVMED 1300/4

checklist items that were not able to be completed to their ECH IV via after action report (AAR). NRAs will aggregate data and report shortfalls in their AAR (e.g. 12 members do not have a GTCC, 15 members require an official passport for their mob

-

to

-

billet

ultimate duty station but do not possess one, 10 members require an audiogram, etc.). The AAR is intended to consolidate issues or shortfalls ECH V commands are experiencing executing AM processes and include possible solutions to al

leviate the issue. MOBEX

EXERCISE SCORECARD and MOBEX AAR Template documents are provided

under the MOB Required Documents tab of the on the CNRFC N15 Distributed Activation SharePoint Portal (link provided in paragraph 4.C.(3) above) to aid ECH V commands in tracking/

aggregating during the exercise and with the completion of their AAR at the conclusion of the exercise. AARs will include, by

-

name,

identified participants who did not submit a strength gain package, NAVPERS 1300/22, or NAVMED 1300/4 as directed, along with the reasons for non

-

participation and any corrective action taken by the NRA such as formal counseling, assigning an admin U, or assigning unauthorized absence (UA). NRA should solicit constructive feedback about exercise execution from participating SELRES and incorporate that feedback in their AAR.

F. AAR Requirements. REDCOMs will use data consolidated from their NRC AARs and submit their respective AARs to CNRFC by close of business 28OCT2022. CNAFR and NSWG

-

11 will use data consolidated from their NRA AARs and submit their respective AARs to CNRF by close of business 11NOV2022. CNRFC will consolidate inputs for CNRF

by close of business 09DEC2022. ECH III and IV commands will receive

this task via ETMS2
for tracking purposes.
